

Don't Think of Tomorrow

(MUSIC: Sebastian Leitner
WORDS: Gerd Hoch)

PILOT: 5...4...3...2...1...contact!

We're cruising through the universe, up and down the Milky Way.
It's been about a thousand years ago we left home - I forget the day.

We're always on the run as long as we can go on.
We're always on the run as long as we're going strong.

No matter where we get stranded, soon we will be up and away.
Nobody can tie us down for years, can't force us to stay.
We'll go when the time is right to go.
What more can I say, but...

(chorus)

Don't think of tomorrow,
We're living today.
We know that tomorrow,
Today'll be far away.
Today'll be far away.

PILOT: Your attention, please! We'll be entering the Earth's atmosphere in approximately ten minutes. Please return to the life support systems provided and be seated. Thank you!

We lifted from Mars about a week ago 'cause we didn't like the plastic food.
We neither could - wouldn't stay there 'cause girls there're looking like tanks - that ain't so good.

We're always on the run as long as we can go on.
We're always on the run as long as we're going strong.

No matter where we get stranded, soon we will be up and away.
Nobody can tie us down for years, can't force us to stay.
We'll go when the time is right to go.
What more can I say, but...

(chorus)
